

Project Profile

Project Title	Fordoun Airfield
Client	Hunter Construction
Contract Value	£1.5M
GHA Livigunn Services	Contractor

Description

The design of an external concrete hardstanding designed to store off shore drilling pipes equating to a line load of 180kN/m. A 250mm thick modified concrete reinforced using 4.6kg/m³ of 'macro' synthetic structural fibres was constructed to an area 420m x 150m. The concrete was constructed using slip pave technique with only sawn induced joints throughout.
