

Project Profile

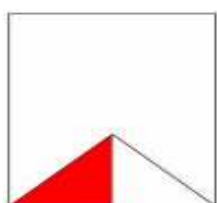

Project Title	New Supermarket & Petrol Filling Station, Illingworth
Client	Wm Morrison Supermarkets Plc
Project Value	Undisclosed
Contract Conditions	SBC05 with Quantities including Sectional Completions
Duration	37 weeks (Store) 39 weeks (Store and PFS)
BSCP Services	Full structural and civil engineering design and detailing

Description

The site already incorporated a fully trading supermarket and petrol filling station (PFS), which were to be demolished and replaced under the scheme proposals. In order to maintain an ongoing service to the local residents, the store remained trading until 12 weeks prior to project completion, whilst construction of the new supermarket and PFS progressed with minimal disruption to customers. Within the 12 week period, the existing store and basement were demolished, backfilled and the car park area over completed.

The supermarket, associated service yard and car parks were completed on time within the 37 week programme with the PFS completion as programmed following on some 2 weeks later.
